

# Prologue™ Financials Accounts Payable: OCR

---

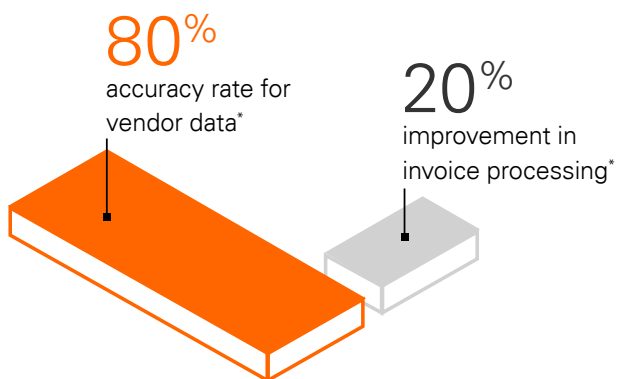

Save Time and Improve  
Accuracy When Processing  
Digitized Invoices

---

## Manual data entry for invoice processing is laborious and mundane. Optical character recognition technology is the answer. Prologue Financials Accounts Payable: OCR from Fiserv enables systematic retrieval of data from digitized invoices and then populates that data in Accounts Payable.

OCR eliminates time-consuming and error-prone manual data entry. In addition, this optional functionality is easy to set up without requiring a professional services engagement.

With a 90% success rate for processing standard invoices, OCR enables faster transaction and vendor payment processing. Early beta users identified a 20% improvement in their invoice processing time using OCR, with an 80% accuracy rate for vendor data. And in addition to eliminating human input error, OCR also flags suspected values that may need validation before saving a transaction.

\*According to Fiserv analysis of client results

Seamlessly integrated with the Accounts Payable transaction screen, OCR efficiently processes invoice data for standard invoice formats. Its ease of use ensures a short learning curve for team members and eliminates the need to store paper invoices.

The solution's functionality includes:

- Easy setup of the workflow queue
- Seamless integration with current document scanning and folder scanning functions in Prologue
- Automated GL account distribution for vendors
- Capability to view OCR status of processed documents

### The Right Solution at the Right Time

With the current shortage of experienced staff in many organizations, the ability to better manage manual processes such as invoicing is a real help. OCR streamlines digitized invoicing and reduces errors, enabling your staff to process invoices faster.

#### Key Benefits

- Reduces processing time
- Decreases errors and improves accuracy
- Eliminates paper invoice storage
- Easy to set up
