

 Solution

CardFree CashSM for ATM Operators

CardFree Cash from Fiserv is revolutionizing the financial self-service industry – enabling you to provide cardless access to cash when consumers need it most. Increase ATM traffic and gain a competitive edge with our innovative, network-based solution.

No Card, No Problem

There are numerous reasons why consumers might need immediate, card-free access to cash: in an emergency, when traveling, while awaiting a card replacement – or simply for convenience.

CardFree Cash is a patented, network-based solution that delivers cardless cash access at thousands of ATMs nationwide. All that is needed is a mobile device and debit account.

Accountholders simply generate a secure tokenized access code on a mobile device, then enter the access code and their PIN to get cash instantly – at your ATMs. Nearby CardFree Cash-enabled ATMs are easily located using the geolocation feature on a mobile device or through our CardFree Cash locator at popmoneylocator.com.

With our cutting-edge cardless cash solution, you can generate new revenue and exposure for your ATM locations.

Convenience

Simply for convenience, a consumer can generate an access code to get cash instead of carrying a physical card or wallet.

Emergency Cash

If a consumer loses a wallet while traveling, they can still access cash immediately without a physical card.

Interim Access

A consumer can access cash while waiting for a lost, stolen or breached card to be replaced.

Send Cash

Future enhancements will allow consumers to send cash to someone else or to themselves. The receiver can collect the cash at a participating ATM.

Fast and Cost-Effective Market Entry

CardFree Cash leverages Accel[®] debit payments network from Fiserv, minimizing your investment and accelerating your time to market with a mobile cash access solution.

Enabling your ATMs with Accel and CardFree Cash gives you access to millions of consumers from financial institutions that use the Accel network, putting you on the path to incremental transaction growth with a premium interchange rate for each CardFree Cash transaction and new fee revenue opportunities.

Adding CardFree Cash is simple – it only requires a terminal software download and minor configuration.

Your organization will also benefit from future enhancements to CardFree Cash, which could drive additional volume to your ATM locations.

Addressing the Needs of a New Generation

Now is the time to position your organization to successfully engage the next generation of consumers. As mobility and immediacy continue to dominate consumer preferences, CardFree Cash will set you apart from competitors and help you meet the needs of a diverse and changing market.

CardFree Cash is improving the way consumers access their funds in the digital age – while increasing loyalty among consumers who value convenience and innovation. Consumers simply use their mobile devices to locate a nearby CardFree Cash-enabled ATM, generate a secure access code and get cash safely and instantly – without a card.
